## Creator-23

The GS-Creator-23 is configured to provide an extremely powerful AS workstation platform within a reasonably economical budget.

The unit incorporates a water-cooled high specification Intel processor with a specially selected performance motherboard. OS and software storage is provided by dual spanned M2 drives giving the fastest data transfer speeds required by graphics and video applications. A fast 4TB internal drive is also supplied for the larger than usual user data requirements, along with 10Gb networking as standard. Also as requested by most AS designers, incorporation of card reader, USB3 and full 7.1 channel audio is also provided.

CPU	Intel Core I9 3Ghz 24-Core
CPU Cooler	3 Fan Water-Cooler
